

Roster freezes are always going to be a bit confusing for the Spring Season, but here is an overview. The FWRL roster freeze date for the core team (before guest players) is March 1. Any player added to your team after March 1 is a guest player for FWRL purposes, even though they may be on the subsequent National Championship Series roster. If your state association has already frozen National Championship Series rosters on March 1, then that is your frozen FWRL roster. If your state association freezes National Championship Series rosters after March 1, but before the end of the FWRL season, then your March 1 roster is your frozen FWRL roster.

Specifically, Far West Regional League rosters are frozen as follows:

- 1) If your National Championship Series roster (State Cup or National Cup) is frozen on March 1, then that is your frozen FWRL roster. If it is different than the roster in the computer, mail a copy of your frozen State Cup roster to 4152 Dietz Farm Cir NW, Albuquerque, New Mexico 87107, postmarked by March 2. You can also e-mail the roster to fwrljt@aol.com.
- 2) If your state association has not frozen State Cup rosters on March 1, and your roster is correct in the computer, then that is your frozen FWRL roster and you don't need to do anything else. I'll print a hard copy, and any subsequent roster additions for your team are counted as guest players for the remainder of the FWRL season. Any roster changes subsequent to March 1 count against your 25 player maximum or your guest player maximum – whichever is reached first.
- 3) If your state association has not frozen State Cup rosters on March 1, but your roster is not correct in the computer on March 1, then mail a hard copy to the above address, postmarked by March 2 or e-mail to fwrljt@aol.com. Any subsequent roster additions for your team are counted as guest players for the remainder of the FWRL season. Your roster changes count against your 25 player maximum or your guest player maximum – whichever is reached first.
